Subject: Town Council Planning - Nordon

Sirs

I know that this is the last day of the survey for the Blandford Plus project, but we wish you to address our concerns for the development of the Nordon area. It appears to us that for cost-effectiveness, new or adapted dwellings will be developed in this area.

Our primary concern is to do with the water runoff onto our and adjoining properties towards Holland Way.

Our secondary concern is with the degree of them overlooking our properties and loss of light.

Lastly, we are concerned with the conservation of the trees. As you know, we have lost some during recent storms. Are we correct to assume that the survivors are to be maintained?

Yours faithfully
