Dear Sir

I have read the draft plan and consider it to be well thought out and presented.

I recognise that it is not possible formally to omit any proposed development on Dorchester Hill, to which I have made my objections. I am not convinced that due care has been taken in the proposals for this area to protect the existing flora and fauna, and the proposed development itself lacks design quality.

I agree that the focus of housing development should be to the north of the town and that additional provision of the usual services - education, medical and leisure - are an essential part of any such development. It is also essential, as the report states, that developments are high quality and reflect the vernacular of Blandford Forum and the local villages.

Thank you for such a well prepared document
